# Official Genuine Parts

*This wide range of Stiga Spare Parts and Accessories is developed building on the long experience of Stiga in manufacturing and development of garden machinery, and it is suitable for all Stiga machines*

*Developed together with the machines, these accessories enable you to always get high performances in total safety. Strict tests, careful checks during all the processes, high quality of the raw material used and the perfect applicability on the machines are the fundamental elements which make STIGA Spare Parts and Accessories different from other general after-market products.*

*Only original STIGA Spare Parts and Accessories are tested and approved by the home-factory ensuring total safety during use, especially for potentially dangerous parts, such as blades. For these reasons, during all the maintenance activities, it is fundamental to verify that the broken or damaged part is substituted only by original STIGA Spare Parts and Accessories.*

*All the technical and fitting information can be easily found in the present catalogue.*

*STIGA Spare Parts and Accessories: Guaranteed quality and safety.*

# *Robot Mowers*

# Care

Stiga offers a waterproof **cover**, which allows protection of the recharging base in total safety if it has to stay outdoors. It can be adapted to the robot itself. The **charging base cover**, instead, protects the robot from all atmospheric agents, like sun and rain. It's easy to assemble/disassemble in case of ordinary maintenance or cleaning operations. Designed to join functionality (the correct fresh air flow is assured by the front and side windows, while its shape allows the easy access to the keypad without removing the robot from charge) and aesthetic (an unmistakable Stiga "sign" will stuck in your garden for all the cutting season).

# Electronics

The sophisticated high-tech Autoclip range of robots offer several advantages and accessories. The **SMS modules** allow installers to check remotely on the Robot's daily tasks and performance. The **Compass** option checks on directional movement of the robot while it works over difficult terrain. The **USB bluetooth** convertor connects your PC and the Robot. The **bluetooth receiver** enables wireless software updates via the Stiga Client. Stiga provides a **remote control** in order to «guide» the robot manually, over-riding its own programming.

# Wheels

Autoclip machines (both 2 and 4 WD) are built to mow grass effectively on flat and sloping landscapes. Stiga offer a wide range of accessory wheels to increase the already remarkable stability of their products. The machine is thus able to maintain its direction, maximizing the power efficiency of its battery. When equipped the machine has extra grip, climbing smoothly in all conditions, minimizing risk to the lawn.

# Blades

Stiga blades are made of robust steel, ensuring a long-lasting, very stable robot cutting performance; thanks to this grass will remain healthy after repeated mawing. Contrary to other manufacturers' technical solutions, Stiga's robustness and dimension give the robot extra solidity in case of impact with small objects (sticks or pebbles) allowing impact to occur without damage. More than just ensuring savings in financial outlay, this feature also adds to the safety of the product no dangerous metal-cutting shards and splinters will remain as debris on the lawn. Further, flat blades are designed with 8 sharpened cuttings, allowing for usage on both sides (inverting the wheels upside down). And their circular, flat shape, makes for easier sharpening.

# Lithium Batteries & Chargers

Stiga guarantees original high quality accessories such as lithium batteries. This type of battery lasts 2-3 times longer than rechargeable batteries (Ni-Cd and Ni-Mh). It's light and doesn't suffer from the so-called "memory effect", has slow self-discharge if not used (about 5% per month) and discharges very slowly.

# Installation

To ensure best performance Autoclip robot models requiring installation should be subject to a careful installation procedure. To this end Stiga provides the best installation materials and solution. Autoclip **cable** is engineered to support an extremely strong sinusoidal signal - the strongest in the market for this product category. The cable ensures that the signal is strong at all points of the activity perimeter, even at elevated distances from the charging station. The cable is made in tin-plated copper and its diameter is - Ø 3.0 mm. (internal it's 1,5 mm.); reel length is 100 and 300 mt. The cable for the 223 and 225 S has a 2.35 mm outside diameter and 0.75mm inside diameter. During normal installation, if a joint on the cable is needed, Stiga offer a very good self bonding electrical tape. The **tape** is uniquely engineered and highly robust, water/humidity-proof, to join seamlessly into a single cable-tape. To optimise the effect, the tape has got to be stretched with fingers, before applying. **Nails** are provided in a 100 and 200 units pack.

A man wearing a dark jacket, dark pants, and safety gear (earmuffs and a clear face shield) is using a brush cutter in a field of tall, dry grass. The brush cutter has a yellow motor housing and a long silver shaft. The background shows a line of green trees under a clear blue sky. A semi-transparent white box is overlaid on the image, containing the title text.

# *Brush Cutters & Trimmers*

# Trimmer Heads

For hedgecutters and trimmers, Stiga offers different cutting systems (nylon line and metal blades). These accessories are suitable for all users and perfect for the last touches that make a garden tidy and impeccable at all time.

# Trimmer Lines

The lines are available with 3 cross-sections and each one is featured by a different colour: **round-yellow** (high-strength resistant line, resistant to breakage. Highly flexible, suitable for any temperature and ideal for soft thick grass). **Square-grey** (highly resistant line suitable for all types of grass, even the toughest). **Star-shaped-black** (unmatched cutting performance, grass is clean cut, ensuring no breakage or tearing; constant and uniform consumption).

# Blade Holders

Together with the blade, the blade holder is one of the main safety components both for tractors and walk behinds machinery. In case of clashes with obstacles, it's fundamental that both blade and blade holder remain complete, to avoid sharp parts hit the users or people around. For this reason, Stiga blade holders are tested with destructive and entirety tests to maintain complete safety.

ATTENTION: for friction blade holders see the technical section

# Blades

A complete range of blades for different cutting procedure, always in total safety. All Stiga blades are tested and can be approved only if they stand the impact test to guarantee user's safety even in case of accidental clashes against stones, rocks or other hidden obstacles. Mulching blades mince grass into small particles, that remain under the bodywork, becoming soil for the lawn. The special drawing of the collecting blade has a fin on both tips to facilitate cut grass down flow, through the exhaust manifold, up to the grass catcher.

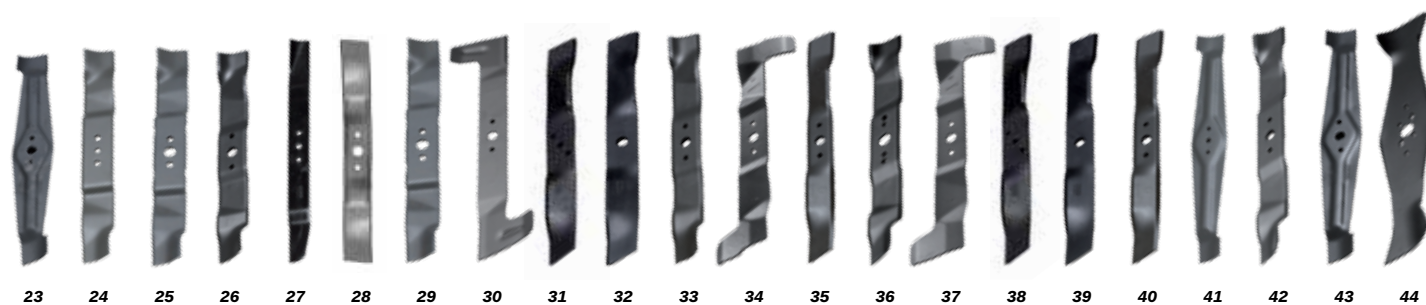

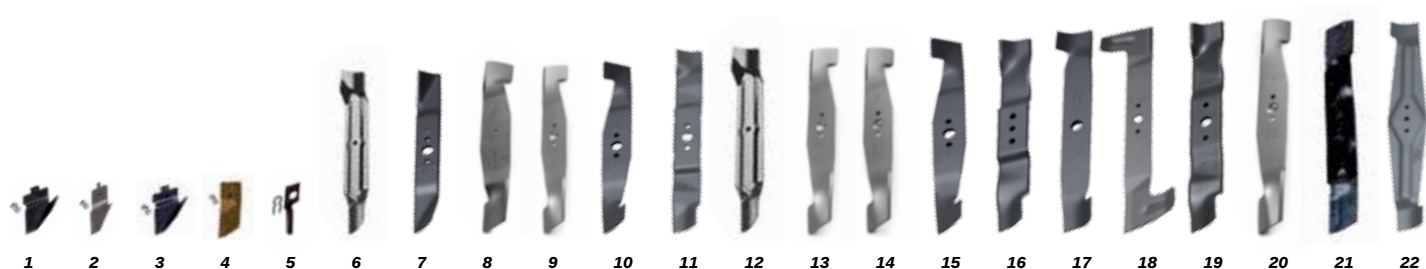

New Stiga Pack 2015

**Packaging (pos. 9)**  
 DIMENSIONS: 6,5x40x3,2 cm  
 GROSS WEIGHT: 0,3 Kg approx.

**Packaging (pos. 28)**  
 DIMENSIONS: 12x53x3,7 cm  
 GROSS WEIGHT: 1 Kg approx.

# Belts

All Stiga belts are developed following measurements and tolerances which let the belt itself to adapt perfectly to the machine. Made with a specific length, different for each machine, Stiga belts guarantees the correct operations of all the parts, avoiding any possibility of damage or breaking that can occur using non original belt.

**New Stiga Pack  
2015**

## Lithium Batteries & Chargers

As to battery lawnmowers, apart from the batteries supplied with the machine (2.6 and 3.0 Ah) a more powerful battery is available (4.4 Ah) allowing mowing for longer periods of time. All Stiga batteries are lithium. The quick battery charger allows cutting down on recharging time. In fact, thanks to it, it is possible to recharge the battery in 1 hour rather than 3 hours as in traditional battery charger.

## Care

The Stiga scraper is ideal to get rid of the grass and soil residues left on the cutting tray quickly and safely, since it guarantees super performance over time. As for lawnmowers already fitted with a hose attachment, we recommend residues are removed with the scraper before using the water jet. Thanks to the protective cover in strong waterproof nylon and available in two sizes, when not in use the machine can be left away from dust, dirt and the weather.

A man with a beard, wearing a light blue checkered shirt and dark pants, is smiling while operating a yellow and grey front loader. The machine is positioned on a grassy area next to a large tree with a mossy trunk. The background is filled with lush green trees and foliage. A semi-transparent white banner is overlaid across the middle of the image, containing the text 'Front Mowers'.

# *Engine Parts*

# Filters

The aim of the filter is filtering the air that is channelled from the outside to the combustion chamber, getting rid of all impurities. A non-perfectly clean air filter can affect the performance and life of the engine itself. It is therefore vital to check it and replace it when dirty. The Stiga range includes filters suitable for each type of machine.

# Spark Plugs

The Stiga spark plugs are suitable for all 2 and 4 stroke engines from the Stiga machines. In particular the GGP K7RTC spark plug has been designed specifically for the GGP 100 cc engine fitted on all lawnmowers and tillers. These spark plugs reduce the formation of combustion deposits therefore reducing the risk of faulty ignition and internal faults. They have a long life and are highly resistant to vibrations.

A close-up photograph showing a person's hands pouring orange motor oil from a large plastic jug into the oil filler neck of a vehicle. The jug has a green handle and a green cap. The oil is being poured into a black plastic filler neck. The background is a blurred outdoor setting with green grass. The text "Lubricants & Cans" is overlaid in a white box in the center of the image.

# *Lubricants & Cans*

## Chain Oil

Stiga offers high quality oil available in bottles of various sizes to meet any kind of requirement. The Stiga chain oil is vital to avoid excessive friction between the bar and the chain that might cause wear and tear as well as damages.

Code	EAN	Pos	Type	Specifications	Capacity	PCS per Box
1111-9149-01	7313329113102	1	Mineral	-	1,4 lt	9
1111-9150-01	7313329113119	2	Mineral	-	4 lt	3

## 2 Stroke Oil

The engine oil aims at protecting metal surfaces from wear and reducing the friction of the mechanical elements touching and moving one against the other. Even more oil helps with cooling the mechanisms transferring the heat from the hotter to the cooler areas, keeps mechanical elements clean preventing the formation of any deposits, keeping contaminants suspended and sealing piston rings and cylinders. For this reason engine oil must be checked and replaced as required. Stiga propose in his range 2-stroke engine oils syntetic and semi-syntetic. Syntetic ones are API TC (mineral-based, good quality, designed specifically for air-cooled engines) and JASO FC (high quality, high lubrication power, low spark plug dirt, less cylinder residues, less fumes and therefore better engine performance). Semi-syntetics oils are API TC ++ that means that they have the better specifications, so they are the best in terms of quality.

Code	EAN	Pos	Type	Specifications	Capacity	PCS per Box

## 4 Stroke Oil

Stiga 4 stroke engine oils offers different kinds of oils. SAE 30 is superb for use with 0° - 30° outside temperatures, the specifications API CF/SG mean that is good for both gasoline and diesel engines. SAE 20W-50 is a very dense oil, which can cover the spaces between the sliding parts thanks to its constant viscosity. SAE 10W-30 designates a multi-grade oil. The first number '10W' is the viscosity of the oil at cold temperature and the second number is the viscosity at 100 °C. SAE 5W-50 allows a reduction in fuel consumption due to its special viscosity at both high and low temperatures. It has an excellent viscosity behaviour when cold.

Code	EAN	Pos	Type	Specifications	Capacity	PCS per Box
1111-9140-01	7313329112747	1	Mineral SAE 30	API SG/CF	0,6 lt	12

# Transmission Oil

Transmission oil plays a key role in ensuring the availability and usability of the power generated by the motor, since it ensures the functioning of transmissions under harsh conditions in terms of temperatures and loads on the gears. Stiga transmission oil is a multigrade oil that guarantees viscosity at both very high and low temperatures, making it a very versatile and high-performance oil.

Code	EAN	Pos	Type	Specifications	Capacity	PCS per Box

## Cans

The yellow fuel **can** is certified for land and sea transport. The dispenser allows the liquid to run out continuously without any over-flowing. The cap has special seals suitable to be in contact with the various types of hydrocarbons. The **combican** canister holds 5 litres of petrol and 2 litres of oil. It is fitted with an effective anti-overflow device so that filling is stopped automatically when the tank is full. The 2 cans can be separated.
